INTERVIEW – Taleban Dooda Chats About New **Mixtape!**

Taleban Dooda has just dropped his excellent new mixtape “Taleban vs Dooda” via Warner Records.

This new project sees the artist express his emotions in the most beautiful way possible. “Taleband vs Dooda” sees ten fantastic tracks where he dives deep into his soul as he shares his life through stunning lyricism. The mixtape starts with the track “Before The Rap” which also sees an intense music video that brings the song to life. The mixtape also sees other fantastic tracks including bluesy single “Mind of a Maniac,” “Come After Me” and “Pep Rally.”

Taleban Dooda is perfect for the R&B lovers. His music is real and he’s not afraid to tell his truth through his talents. Here is what he had to say about his new project:

Let’s start by talking about your mixtape you have coming out. What can you tell us about it?

I can say it’s nothing but bangers and nobody will be disappointed.

Could you explain to us your creative process when creating your mixtape?

I mean it’s all about what I’m thinking about or how I’m feeling in the moment, and I got much more in store.

What sort of messages would you like your listeners to take away from your lyricism?

On one side I want them to know life is a battlefield, and it’s either eat or be eaten, so never back down from anyone or anything. On the other side, just to show them who you really are .. not what you had to become.

If I told you to write a song based on what you’re feeling right now, what would it be about and what would it be called?

Umm I don’t know. Maybe anxious because I’m ready for everybody to hear these bangers.

What advice would you give to a young musician trying to break out into the music industry?

Don't give up when things get hard; just keep going hard and your time to shine will come sooner than you think.

Let's talk about collaborations. If you could work with any musician for a collaboration, who would it be and why?

I would say Central Cee because I want to get that UK side going for me and no lie I'm kind of a big fan of artists out of the UK.

You're still at the very beginnings of your career. What are your main goals that you would like to achieve?

I want plaques and number one records to be able to take care of the ones I love while I do what I love. And I can't forget the sold-out shows.

How do you feel the internet has impacted the music industry?

I think it has its flaws, but it's also good because without the support of the internet we as artists wouldn't be anything for real.

If you could change anything about the music industry, what would it be and why?

I wouldn't change anything except making the underrated artist get overrated.

Finally, can you tell us of any future plans for yourself?

More and more and more.....real music
