

The winter months may be upon us, but Carlie Hanson is coming in hot with an addictive new love song titled "Side Effects" to inspire us this cuffing season. So much better to be cuddled up than to be living thru the angst of a love that is not with you. "Side Effects is about trying to create distractions when you can't be with the one you want, but nothing really soothes you, so you end up just feeling stir-crazy," says Carlie.

"Side Effects" comes after Carlie's summer release of her debut JUNK EP which has now streamed upward of 40 Million.

Listen to "Side Effects" [HERE](#)

In other news, Carlie is on tour in Australia with Lauv....
